

HYDRANSAFE FR EHC

Lubrication

High performance fire-resistant phosphate ester based hydraulic fluid.

APPLICATIONS

Hydraulic systems

- **HYDRANSAFE FR EHC** is a high performance, fire resistant hydraulic fluid based on selected phosphate esters and designed for hydraulic circuits which require the use of safety fluids.
- **HYDRANSAFE FR EHC** is especially designed for use in electrohydraulic governor systems of steam turbines, including systems using fine tolerance servo valves.
- Working temperature : - 10 to + 120°C.

SPECIFICATIONS

International Standards

OEM

- ISO 12922 - HFDR
- ASTM 4293 – HFDR
- ALSTOM HTGD 690 149
- GEK 46357
- SIEMENS KWU – TLV 9012 03

ADVANTAGES

HYDRANSAFE FR EHC is a fluid free of water which displays superior fire resistance properties (ISO Standard 12922). It has an excellent overall performance in hydraulic circuits and hydraulic governor systems of steam turbines according to OEM requirement :

- Good lubrication performance and anti-wear properties
- Excellent oxidation stability
- Low volatility
- Prevention of foaming and very quick air release
- Good resistance to hydrolysis and very quick demulsibility
- Excellent shear stability
- Good filterability.

SPECIAL INSTRUCTIONS

HYDRANSAFE FR EHC is not miscible with conventional hydraulic mineral oils or with water-glycol fluids. However **HYDRANSAFE FR EHC** can generally be mixed in any proportion with phosphate ester based fluids. Certain precautions must be taken when using **HYDRANSAFE FR EHC** especially in an equipment designed to be used with a mineral oil:

- Seals and hoses : these fluids are not compatible with conventional elastomers. Use only fluorinated elastomers (Viton – Teflon).
 - Paints : HYDRANSafe FR EHC will cause normal paints to dissolve or swell. It is best to avoid using paints on tanks (special resins are available that are compatible with phosphate esters).
- As a general rule we recommend that the user consult AFNOR E 48-640 on “How to use fire-resistant fluids”.

PHYSICAL PROPERTY	UNIT	TYPICAL VALUE	TEST METHOD
Color		1	ASTM D 1500
Kinematic viscosity	Cst	5.4	ISO 3104
- at 100 °C		44.5	
- at 40 °C		1676	
- at 0 °C			
Specific gravity at 20 °C		1.15	ISO 3675
Pour point	°C	- 24	ISO 3016
Acid number	mg KOH/g	0.05	ISO 6619
Chlorine content	ppm	6	Microcoulometric
Water content	% w/w	0.04	ISO 760
Volume resistivity at 20 °C	Mohm m	450	IEC 60247
Particulate contamination		-/15/12	ISO 4406
Foaming at 24 °C	Ml	10	ISO 6247
- tendency		0	
- stability			
Air release at 50 °C	min	5.5	ISO 9120
Water separation	min	5	ISO 6614

LUBRICATION PERFORMANCE PROPERTY	UNIT	TYPICAL VALUE	TEST METHOD
Vickers Vane Pump Test	mg		ISO 20763
